

Vicinay Marine Innovation's mission is to provide value to the Vicinay Marine group companies, the Oil&Gas and Marine Renewable Energy industries through R&D&I projects and engineering services.

To this end, a quality management system is being developed which is oriented to the continuing improvement our activity, with the main premise of achieving the satisfaction our customers, taking into account their requirements, legal requirements or any other necessities, arising internally or externally, through our system based on the UNE-EN ISO 9001: 2015 standard.

Vicinay Marine Innovation's vision is to become a center of knowledge and experimentation recognized in the offshore industry.

For all this, the Department is committed to providing all human and technical resources needed to achieve quality and continuous improvement goals, fulfilling stakeholders' requirements whether they have direct or indirect impact on our provided quality.

As an organization committed to quality, we base our activities on the following values:

**INNOVATION AND CREATIVITY.** Generate innovative solutions that add value to VMi and our customers.

**PROFESSIONALISM.** To be rigorous and responsible in the development of a quality work that generates satisfaction in our stakeholders.

**DYNAMISM.** To be proactive, flexible and versatile to effectively answer to new needs, environments and opportunities.

**TEAM WORKING.** Joint efforts, knowledge and talent of our people and partners to maximize the result.

**ILLUSION.** To encourage and adopt an optimistic, motivating and innovative attitude that allows facing new challenges, as well as day-to-day activities.

**GROWTH.** To Increase capabilities and competencies to generate new knowledge applicable to the offshore industry and new markets.

Our Quality System has a set of procedures and a definition of the organization's structure, which helps to continuously meet the needs of Vicinay Marine Innovation and improve the allocation of resources available for all its activities.

This policy is communicated and understood within the organization and by its stakeholders and is reviewed annually for continuing suitability.
